

What do pupils think about DT at Millfields?

Learning in DT in KS1 & KS2

Autumn 2016

- What did you enjoy doing in DT?
- What skills have you used?
- How could we improve the teaching of DT at Millfields?

Year 2 - To build a vehicle with wheels

I liked using all of the crafts that we had. It meant we could try out lots of things.

Angelica

Making the moon buggies and then racing them was brilliant. And I won!

Leo

I used a saw and the glue gun. We had to have a grown-up with us.

Sonny

Making the wheels was fiddly. I had to test them to see which ones worked the best.

Zara

We could build a real buggy and satellite!

Cazlen

Year 4 - To make a healthy savoury dish

We made our own recipe for Egyptian bread.

We had to make a healthy filling to eat our bread with.

Wajidur

Reuben

We had to follow a recipe carefully and make sure we cooked it for a certain time.

I had to use accurate weighing or the bread would have been disgusting.

Eamonn

It would have been nice to go to an Egyptian Restaurant.

Elvis

Jennifer

Year 5 – To use electrical systems in a product

We made a protective box using electrical devices. It was tricky but we learnt how to do it by experimenting.

Joe

We had to design and make a security box for our Sutton Hoo artefacts. Making the alarms was great fun.

Arjanit

We used scissors and crocodile clips to make our boxes. We had to be careful.

We had to experiment and keep on trying. My design wasn't good at first but I made it better.

Zainab

It would have been good to see a real one before we made ours then we could have improved it.

Joseph
